

Tuberculosis (TB) Screening Program
Potential Costs

Cost – medical costs will vary, but in general students can expect the following costs associated with testing and treating tuberculosis

- Skin test (TST) - \$0-\$15
- IGRA - \$45-\$85
- Chest x-ray - \$75-\$150
- Doctor visit to diagnose TB status - \$50-\$250
- Isoniazid (INH) medication - \$10-\$20 for nine months of treatment

*The local public health agency can refer any individual who does not have adequate insurance or no insurance for possible financial assistance.

**Either the TST or IGRA will be given. An individual will not need both tests.
